December 6, 2019 ·

We are pleased to announce the following 2018 CLS award winners:

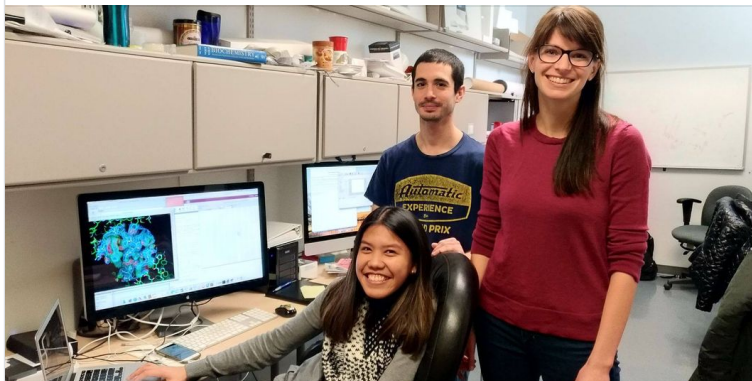

G. Michael Bancroft PhD Thesis Award:

There were some exceptional submissions for this award. We couldn't decide between the top two theses so we decided we would split the award. The winners are Brett Leedahl from the [University of Saskatchewan](#) for his thesis "The Electronic and Magnetic Effects of 3d Transition Metal Impurities in Semiconductors" and Janice Reimer from [McGill University](#) for her thesis "Structures of the linear gramicidin synthetase reveal its elegant synthetic cycle." <https://buff.ly/2qjiAdC>

Young Investigator Excellence Award:

From a very talented field of submissions, we selected Prof. Julie Cosmidis from [Penn State](#) University. Congratulations! We hope the CLS will remain an important tool in your research program. <https://buff.ly/33LdmVH>

Congratulations to the winners and to all of the nominees.
