

*Accession Name:*  
Anderson

*Accession Number:*

*Parentage:*  
Columbia x Wealthy

Released by:  
Dr. C.F. Patterson, University of Saskatchewan, Saskatoon SK

*Date:*  
1960

*Notes:*  
Mid-Sept.; somewhat concial; light red with some splashing up to 2" x 1 3/4" under field conditions, without irrigation at Saskatoon; white fleshed; mildly sub-acid; good quality, excellent keeper.  
-University of Saskatchewan Fruit Introductions, Patterson, 1960

fruit 4.5cm, dark red on light ground. Mid season. Thinning does little to increase apple size, Fair quality. HI.  
-Edible Apples in Prairie Canada

Thinning did not appreciably increase the size of this variety and it fell short of the 2 inch mark originally described. This is one of the smaller sized introductions and does not compare favourably with the larger fruited ones.
