

## Trail

*Lineage:*Northern Queen x Rideau

*Introduced by:* Dr. W.M. Saunders, Dominion Experimental Farm Service, Ottawa, ON.

*Date:* 1911

### *Notes:*

Fruit 4cm, orange-red. Dessert and cooking, but not good for canning. Yield and quality good, vigor fair. Bruises easily. Late for some areas of the prairies. "A good crab in the 1930s" says Coutts (1991). [FB1. H2-3.](#)

[-Edible Apples in Prairie Canada](#)

An old introduction from the Central Experimental Farm, Ottawa, Ontario, that lacks sufficient hardiness except for the extreme southerly portions of the province .

[-Hort Facts, Nelson, 1976](#)

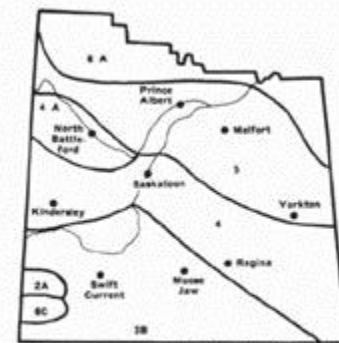

Fig. 1—Zones for Fruit Varieties, from the 1975 Guide to Farm Practice in Saskatchewan. This is an adaptation from a Prairie Province zonation map comprised of 5 major zones and various subdivisions.
