Researcher	Title	Co-Author	Categories	Year	Notes
Dr. Darlene Juschka	Responding to Intimate Partner Violence: Challenges Faced Among Service Providers in Northern Communities	Wuerch; Zorn; Hampton (UofR)	Addressing violence	2016	A study to better understand the needs of IPV survivors through interview of 8 experienced service providers. Results might help Canadian government to improve services offered.
Dr. Rick Ruddell	The Impact of Resource Development on Interpersonal Violence: Survivor Risk Factors and Experiences.	Jayasundara; Legerski; Danis (USA)	Community violence	2019	Interview data from 10 survivors of IPV shows that industrial development (oil boom) interfere in their sense of security. Implications for future research and policy.
	Oil Development and Intimate Partner Violence: Implementation of Section 8 Housing Policies in the Bakken Region of North Dakota and Montana.	Jayasundara; Legerski; Danis (USA)	Community violence	2018	Industrialization (oil boom) and the impact in housing for survivors of IPV, increasing their vulnerability.
Dr. Nicholas A. Jones	Intimate Partner Violence and Intergenerational Trauma Among Indigenous Women.	Hoffart, Renée (Manitoba)	Community violence	2018	Indigenous women experiences about Residential Schools, with the relation between intergenerational trauma and the normalization of IPV.

Dr. Mary Hampton	Perspectives on Regional Differences and Intimate Partner Violence in Canada: A Qualitative Examination.	Zorn; Wuerch; Faller (U of R)	Addressing violence	2017	Impact of IPV in rural and northern communities. Interviews conducted with participants from Saskatchewan, Manitoba, Alberta and Northwest Territories.
Dr. Gordon Asmundson	Adverse childhood experiences in relation to mood and anxiety disorders in a population-based sample of active military personnel.	Sareen; Henriksen; Bolton; Afifi (Manitoba) ; Stein (UCSD/USA)	Family violence + Addressing violence	2013	Adverse childhood experiences are associated with several mood and anxiety disorders among active military personnel. Intervention strategies to prevent mental health problems should consider the utility of targeting soldiers with exposure to adverse childhood experiences.
	Mental Health Correlates of Intimate Partner Violence in Marital Relationships in a Nationally Representative Sample of Males and Females.	Afifi; Cox; Sareen (Manitoba); MacMillan (McMaster); Stein (UCSD/USA)	Family violence	2009	Data from USA: The relationships between physical IPV and child abuse, mental disorders, and suicidal ideation and attempts among males and females were examined. IPV was associated with poor mental health outcomes for both. Sex differences indicate that females experience a wider range of poor mental health outcomes compared to males.
Dr. Kaila Bruer	A repeated forced-choice lineup procedure provides suspect bias information with no cost to accuracy for older children and adults.	Price, H. L.	Family Violence	2017	
	How sure are you that this is the man you saw? Using confidence judgments to identify a target with child eyewitnesses.	Fitzgerald, R. J., Price, H. L., & Sauer, J. D.		2017	

Dr. Heather Price	Children's episodic and generic reports of alleged abuse.	Schneider (U of R); Roberts (Wilfrid Laurier) ; Hedrick (North Carolina/USA).	Family violence	2011	Forensic interviews: relations between the language of interviewer questions, children's reports, and case and child characteristics. Recommendation: that training for investigators focus on recognition of prompt selection tendencies and developing strategies for posing non-suggestive, episodically focused questions.
Dr. Magdalena Cismaru	Campaigns Targeting Perpetrators of Intimate Partner Violence.	Lavack (Kwantlen Polytechnic)	Addressing violence	2011	The role of marketing: IPV as a global public health concern with physical, emotional, and economic costs. Persuading IPV perpetrators to change their behavior could play an important role in ending violence.
	If the noise coming from next door were loud music, you'd do something about it.	Jensen; Lavack (U of R)	Addressing violence	2010	The role of marketing: 12 advertising campaigns that encourage bystander intervention against intimate partner violence are evaluated, showing that these campaigns are sometimes contradictory or ambiguous, which may limit their effectiveness.
	"Don't Suffer in Silence" - Applying the Integrated Model for Social Marketers to Campaigns Targeting Victims of Domestic Violence.	Lavack (U of R)	Addressing violence	2010	Marketing: recommendations for enhancing future initiatives targeting victims of domestic violence suggest that it is important to emphasize the benefits of changing, as well as to convince victims of domestic violence that they can improve their lives.
