

Clinical Neuroscience GRAND ROUNDS

10:00

Dr. Harvey B. Sarnat, MS, MD, FRCPC

Professor of Pediatrics, Pathology (Neuropathology) and Clinical Neurosciences

University of Calgary

“New Concepts in the Embryological Pathogenesis of Epileptogenic Focal Cortical Dysplasias”

Objectives:

1. Review the current classification of focal cortical dysplasia
 2. Discuss clinical examples of patients with cortical dysplasia
 3. Review the controversies and challenges of the new classification
-

11:00

Dr. Amit Bar-Or, MD, FRCPC, ABPN, FAAN, FANA

Chief, Multiple Sclerosis Division

Director, Center for Neuroinflammation and Neurotherapeutics

Research Scientist, Children’s Hospital of Pennsylvania

Staff Neurologist, Perelman School of Medicine, University of Pennsylvania

“Emerging Themes in Neuroimmunology and B-cell Targeting in Multiple Sclerosis”

Objectives:

1. Describe evolving concepts in the Neuroimmunology of MS
 2. Define multiple roles of B cell subsets in peripheral and CNS inflammation
 3. Understand the presumed therapeutic mode of action of B-cell targeting in multiple sclerosis
-

Friday, September 6 at 10:00 AM
SaskTel Theatre, Royal University Hospital

This is an Accredited Group Learning Activity as defined by the Maintenance of Certification Program (MoCOMP) of the Royal College of Physicians and Surgeons of Canada.
