About this book:

UNESCO Biosphere Reserves are geographical regions of global socio-ecological significance. They are designated within UNESCO's Man and Biosphere Programme, and form an international, intergovernmental network that supports the aims of sustainability science. This book shows their global relevance and outlines lessons learned about biocultural diversity, sustainability, and society. This book will be of great interest to professionals engaged in conservation and sustainable development, NGOs, policy-makers and advanced students in environmental management, ecology, sustainability science, environmental anthropology and geography.

UNESCO Biosphere Reserves

Supporting Biocultural Diversity, Sustainability and Society

Edited by **Maureen G. Reed** and **Martin F. Price**

Series: Earthscan Studies in Natural Resource Management

"A much-needed publication about the relevance of Biosphere Reserves as nature-based solutions that implement emerging and key concepts for our planetary challenges – such as governance and cultural practices for ecosystem management – in a continuous search for ecosystem resilience." - *Angela Andrade, Chair, Commission on Ecosystem Management, International Union for the Conservation of Nature (IUCN)*

"An excellent publication show-casing the role of UNESCO Biosphere Reserves as learning laboratories for sustainable development at a global level by linking cultural diversity to biological diversity for the well-being for humankind, including conflict prevention and management of biodiversity." - *Shamila Nair-Bedouelle, Assistant Director-General for Natural Sciences, UNESCO*

"A must-read for anyone interested in Biosphere Reserves – the first book ever with an international perspective on this innovative concept and its evolving applications to the practices and science of biodiversity conservation, climate change and sustainability." - *Lisen Schultz, Research fellow at Stockholm Resilience Centre, Stockholm University, Sweden*
