Communities Surviving Migration

Village Governance, Environment and Cultural Survival in Indigenous Mexico

Edited by **James P. Robson**, **Dan Klooster** and **Jorge Hernández-Díaz**

Series: Routledge Studies in Environmental Migration, Displacement and Resettlement

Building on empirical work in Oaxaca, Mexico, *Communities Surviving Migration* identifies how out-migration might impact rural communities in other global strongholds of biocultural diversity. Responding to a necessity for more detailed analyses and reporting on migration and environmental change, especially in contexts where rural communities, livelihoods and biodiversity are interconnected, this volume will be of great interest to students and scholars of environmental migration, development studies, population geography, and Latin American studies.
